

Who Cares About Maths? Show Me Pretty Pictures!

Final Words

- ▶ The biggest different between a mathematician and a statistician is the level of abstraction and removal of context.
- ▶ Even though these tools are very simple, but the data + context + programming make things harder.
- ▶ There is nothing stopping you from applying a tool, and it is actually quite fun to do so! But it has to make sense.
- ▶ Come and talk to me or the Sydney Bioinformatics Group to learn more!
